Cultural Heritage Academy for Risk Management Summer School

Risk Management for Historical Buildings and Monuments

The CHARISMA project is dedicated to address the risks posed to cultural heritage in their complexity, adopting a multi-level approach. One of the aims of the project is to develop and pilot training programmes for a future professional figure, the risk manager for cultural heritage. The summer school is part of this process.

Join us for the one-week summer school on risk management for historical buildings and monuments in the western part of Austria. The topics range from emergency plans and cutting-edge web applications to assessment of vulnerability and disaster impact and loss. The week includes visits and assessments of archives and libraries, housed in historical buildings and a focus on cooperation with emergency responders to be able to prepare in the best way possible for managing risks for cultural heritage.
