

Brain Health - Moving towards strategic solutions

Dementia is an urgent problem affecting approximately 57.4 million people worldwide and there is currently no cure. The recognition of dementia as a multifactorial disorder encourages the exploration of new pathways to understand its origins, the expression of symptoms and treatment options. The transdisciplinary cooperation between all disciplines and society is the suggested strategy to solve this societal challenge.

Location

Audimax UWK, Hybrid | 27.04.2023

15:00-15:30	Opening Ceremony > Mag. Friedrich Faulhammer (Rector) > Univ.-Prof. ⁱⁿ Dr. ⁱⁿ Viktoria Weber (Vice-Rector) > Univ.-Prof. ⁱⁿ Dr. ⁱⁿ Stefanie Auer (Vice Dean of the Faculty of Health and Medicine)
