

Life can only multiply until all the phosphorus is gone, and then there is an inexorable halt which nothing can prevent.

—Isaac Asimov

Phosphate Data and Knowledge Hub

P-DaKH

Opening September 2022 the Phosphate Data and Knowledge Hub will become a global clearing house for all relevant information pertaining to the phosphate cycle from mine to field and beyond. Phosphate as a non-substitutable component of all living organisms is a crucial resource for future food security and a major international trade good. P-DaKH as a co-operation between the Global Phosphorus Institute and the University for Continuing Education (Danube University) Krems is dedicated to collecting, analysing and providing reliable data on all stages of the phosphate cycle and to make scientific insight and expert knowledge available to policy makers, business leaders and the general public.

Univ.-Prof. Dr. Gerald Steiner
Scientific Lead P-DaKH
