

The Icam Dual Education “Experience”

Frédérique Pasquier

Icam is a multidisciplinary engineering school. It was created in France in 1898 and has now 14 campuses worldwide. The pedagogy is mainly based on “learning by doing”. So, when the French legislation allowed dual education up to master programs in 1991, Icam immediately offered a dual course.

This presentation shares Icam experience in Dual Education and the challenges that we still have to face.

Frédérique Pasquier, PhD, Head of Studies at Icam Ouest, Campus of Vendée, La Roche-sur-Yon, France.
